

**QUANTA POWER**  
**AUSTRALIA**

## **Environmental and Sustainability Policy**

**Quanta Power strives for excellence in sustainable performance and environmental protection.**

### **QUANTA POWER IS COMMITTED TO:**

- ▶ MAINTAINING an environmental management system that meets the requirements of ISO 14001.
- ▶ COMPLYING with all Environmental Laws, client requirements and relevant codes of practice.
- ▶ COMMITTING to integrating whole-of-life environmental, social and economic considerations throughout the design, construction and operation processes.
- ▶ COMMUNICATING our environmental and sustainability policy and procedures to all workers, contractors and stakeholders.
- ▶ EDUCATING and training our workers and contractors to improve sustainable and environmental awareness, skills and performance.
- ▶ ENCOURAGING ethical environmental and sustainable practice and behaviour, including respect for indigenous culture and community values.
- ▶ INCREASING resilience to future climate change.
- ▶ ESTABLISHING measurable environmental and sustainability performance targets to continuously improve sustainability performance.
- ▶ PROMOTING a culture of innovation, awareness and participation.
- ▶ ENGAGING our employees, suppliers and stakeholders in the continuous improvement of environmental and sustainable performance.
- ▶ CONTINUALLY looking for opportunities to mitigate negative impacts on the local community, environment and habitat.
- ▶ OPTIMISING resource efficiency (materials, energy, land and water) and reduction of waste.
- ▶ MONITORING operational environmental performance and promote reporting of environmental hazards, behaviours and incidents.
